

AVEVA

Industrial software for the design, operation and optimization of industrial assets · www.aveva.com

1967 Founded	~6,500 Employees	Not disclosed Revenue (latest/est.)	Subsidiary Ownership	4.0/5 Glassdoor (1,042)	Yes Digital twin
------------------------	----------------------------	---	--------------------------------	-----------------------------------	----------------------------

01 Overview

No longer an independent company to evaluate on its own financials — AVEVA is now the industrial-software arm of Schneider Electric, and is about to absorb Cognite too, becoming the most consolidated platform on this list. Offering: CONNECT (industrial intelligence platform), PI System (real-time operational data), E3D Design (3D plant design), Unified Engineering, and the AVEVA Industrial AI Assistant — now absorbing Cognite's Data Fusion and Atlas AI as well.	Key facts HQ: Cambridge, UK Ownership: Wholly owned subsidiary of Schneider Electric since Jan 2023 (~\$11.6B acquisition); no longer separately listed Revenue: Not separately disclosed post-acquisition (last standalone: ~\$1.95B, FY2023) Web: www.aveva.com · LinkedIn Key people: Caspar Herzberg (Chief Executive Officer) · Peter Herweck (Chairperson (Schneider Electric CEO)) Digital twin: Yes (extensive, across engineering and operations) · GenAI: Yes (Industrial AI Assistant)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Oil & gas	PETRONAS — AVEVA Predictive Analytics + PI System on rotating equipment	Saved \$17.4M in year one (51 warnings, 12 high-risk), 14x ROI, expanded to 10 new cloud-connected sites	Link
Chemicals / manufacturing	BASF — Smart Manufacturing program	Deployed Enterprise Asset Performance Management with AR and predictive maintenance to improve asset availability and workforce efficiency	Link
Energy (power)	Saudi Aramco — power optimization & cogeneration efficiency advisory platform	65% reduction in emissions, 48% reduction in maintenance costs, 23% increase in mean time between failures (MTBF)	Link

03 Competitive Landscape

Other vendors in this market: Sand Technologies · Palantir Technologies · C3.ai · Cognite · Bentley Systems · IBM watsonx · Honeywell Forge · Siemens Xcelerator Where it sits: Strong digital-twin overlap with Sand, but operating as part of a much larger industrial conglomerate with hardware, energy management and automation businesses behind it.

04 GIP & BlackRock Connections

GIP became a wholly-owned BlackRock subsidiary in October 2024 and now operates as BlackRock's dedicated infrastructure-investment arm. Stakes below are standard institutional/index-fund positions unless otherwise noted.	
Entity	Possible connection
Global Infrastructure Partners	No named GIP portfolio company was confirmed as an AVEVA customer. AVEVA does sell a purpose-built "Unified Operations Center for Data Centers" product directly relevant to GIP's CyrusOne data-center holdings, but no confirmed CyrusOne–AVEVA relationship was found.
BlackRock	The clearest indirect link in this set: AVEVA's parent, Schneider Electric, has BlackRock as its largest shareholder at 7.93% of shares outstanding (per recent filings). AVEVA itself hasn't been separately listed since the 2023 acquisition, so this exposure flows entirely through Schneider's cap table.

05 Sentiment

Customer: Well-documented, quantified case studies (PETRONAS, Saudi Aramco, BASF) and solid third-party product ratings (Gartner Peer Insights ~4.1–4.4 for PI System) — one of the more substantively evidenced customer records on this list.	
What supports the story • Strongest employee Glassdoor rating among the industrial-software incumbents (4.0/5, 78% recommend) • Concrete, audited-style ROI case studies (PETRONAS 14x ROI) with named Fortune 500 customers • Backed by Schneider Electric's global reach and about to absorb Cognite's technology and talent	What to pressure-test • No longer independently evaluable — standalone financials haven't been disclosed since the 2023 acquisition • Employee reviews explicitly flag uncertainty about further internal consolidation under Schneider • Integrating Cognite adds real near-term execution risk on top of the existing Schneider integration

Employee: Generally positive on work-life balance and colleagues; the most-repeated concern is uncertainty about Schneider Electric's long-term integration plans for the brand and team.

Sources: AVEVA public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked "est." or "not disclosed" are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
