

Cognite

Industrial-grade AI platform turning operational data into a unified, contextualized foundation · www.cognite.com

2016 Founded	~800 Employees	\$170M+ (2025) Revenue (latest/est.)	Acquired Ownership	3.2/5 Glassdoor (169)	Yes Digital twin
-----------------	-------------------	---	-----------------------	--------------------------	---------------------

01 Overview

The clearest signal of where this market is heading: an independent industrial-AI platform just sold to a strategic incumbent (Schneider Electric) for 18x revenue, consolidating into AVEVA. Offering: Cognite Data Fusion (unified industrial data model + knowledge graph) and Atlas AI (generative/agentic AI for industrial workflows), covering plant operations, asset management and engineering.	Key facts HQ: Oslo, Norway / Austin, TX Ownership: Being acquired by Schneider Electric for \$3.1B all-cash (announced June 30, 2026), folding into AVEVA Revenue: \$170M+ (2025), up 36% in ARR bookings Web: www.cognite.com · LinkedIn Key people: Girish Rishi (Chief Executive Officer) · John Markus Lervik (Co-Founder & Chief Strategy Officer) · Geir Engdahl (Chief Technology Officer, AI) Digital twin: Yes (core capability) · GenAI: Yes (Atlas AI)

02 Use Cases & Reported Metrics

Sector	Deployment	Reported impact	Source
Oil & gas	Aker BP — maintenance, safety & production optimization on Cognite Data Fusion	Faster condition monitoring, visualized safety risk factors, and hybrid ML-based production optimization across 20+ published case studies	Link
Cross-industry (Forrester TEI study)	Composite heavy-asset organization — Cognite Data Fusion	\$21.6M net value added, 400% ROI, reduced downtime and improved maintenance planning (Forrester Consulting, commissioned study)	Link
OEM / ISV tooling	Cognite Embedded — white-labeled for equipment makers and software vendors	2–3x faster product development, 80% lower total cost of ownership for OEM/ISV partners (e.g., Rockwell Automation's FactoryTalk DataMosaix)	Link

03 Competitive Landscape

Other vendors in this market: Sand Technologies · Palantir Technologies · C3.ai · Bentley Systems · AVEVA · IBM watsonx · Honeywell Forge · Siemens Xcelerator Where it sits: Closest comparable to Sand on the digital-twin/industrial-data angle specifically. Its \$3.1B exit is the reference point for what a well-executed independent player in this space can be worth.

04 Sentiment

Customer: Extensive, detailed public case studies (55+ published, many with Aker BP) and a Forrester-commissioned ROI study showing 400% ROI — among the more substantively documented customer track records on this list, though commissioned studies carry an inherent vendor bias.	
What supports the story • Just validated at a \$3.1B exit (18x 2025 revenue) by a top-tier strategic acquirer, Schneider Electric • Saudi Aramco is both a long-time digitalization partner and an equity investor (7.4% stake, 2022) • Rated a "Leader" by S&P Global among 20 evaluated digital-twin vendors	What to pressure-test • About to lose independence entirely — folding into AVEVA under Schneider Electric, with integration risk for customers and staff • Glassdoor sample size is thin (169 reviews) for a company this size, limiting confidence in the 3.2 rating • Post-acquisition roadmap and brand continuity are open questions as of the deal announcement

Employee: Limited review volume; available reviews are moderately positive but not enough data to draw a confident trend line before the Schneider Electric integration begins.

Sources: Cognite public filings/website, company fact sheets, Wikipedia, PitchBook/Crunchbase/Datanyze/BuiltIn profiles, Glassdoor employer reviews, vendor case studies and press releases as of Sept. 2026. Figures marked "est." or "not disclosed" are third-party estimates or unavailable — not company-confirmed — validate in diligence. Part of the Physical AI / Industrial AI for Critical Infrastructure market landscape.
